RE: IRISH ROW STUDENT HOUSING DST – IRISH ROW APARTMENTS, SOUTH BEND, INDIANA (THE "PROPERTY") – UPDATE, DISTRIBUTION ADJUSTMENT AND PRE-RECORDED WEBINAR

Dear Investor:

Irish Row Student Housing Exchange, L.L.C., the asset manager of the Property (the "Asset Manager"), is writing to update investors on the following:

- Occupancy at the Property and in the market;
- New supply in the area;
- The management strategy and a new property manager;
- Loan matters; and
- An adjustment to distributions.

We have also pre-recorded a webinar to discuss the information in this letter.

OCCUPANCY

The beginning of the 2025 academic year at Notre Dame University began on August 16, 2025. In May, the Property was 38% pre-leased, and we have seen significant progress due to the adapted management strategy, with the Property being 74.54% leased as of October 3, 2025. Per responses to our market survey, occupancy across the entire South Bend market for the 2025/26 academic year was approximately 97%.

NEW SUPPLY & SHADOW MARKET

The Notre Dame market has historically been a late lease-up market, and an increasing number of students are delaying housing commitments later into the leasing cycle, as compared to previous years. We believe this dynamic is attributable to several factors, including new supply near campus, a more competitive leasing environment, and an improvement of the physical assets which make up the shadow market.

The 87 Apartments, located directly across the street from Irish Row, is a purpose built, Class A, off-campus student housing community with 810 beds. The 87 Apartments was built by Toll Brothers from 2022 to 2024, with its first occupancy in August 2024. The development has been a market-wide focal point since construction was announced, and it has affected both the speed of leasing in the market and overall market rents.

The most significant evolution of the shadow market in South Bend is from a prominent local management company named Irish Gold ("Irish Gold"), which provides housing options to students attending the University of Notre Dame, Saint Mary's College and Holy Cross College. During 2021 and 2022, Irish Gold purchased 112 single-family homes, totaling 523 beds, throughout the South Bend market. Over the next two years, Irish Gold refurbished the homes and brought them back into the rental supply in 2024, adding more inventory for the market to absorb.

The new supply has allowed students the luxury of waiting to sign new leases, resulting in slower lease ups and lower asking rents.

ADAPTED MANAGEMENT STRATEGY

In response to competition, we adapted our management strategy and implemented a series of targeted actions to increase traffic and leasing momentum at the Irish Row Apartments, which include:

- *Enhanced marketing efforts:*

  We have intensified digital, marketing campaigns and increased on-campus, promotional activities to boost visibility among students and parents. In addition, we signed an agreement with the University of Notre Dame's athletic department which allows us to market the property at athletic events including men's baseball and lacrosse games and the Blue-Gold Spring football game, which is a significant on-campus event. As part of this agreement, we also have access to the University's email lists, which will allow for proactive outreach to potential residents.

- *Increased leasing incentives:*

  We continue to offer a variety of limited-time concessions and leasing incentives, including gift cards, waived application and administrative fees, referral bonuses and enrollment in raffles for prizes upon signing a lease.

- *Capital expenditures:*

  To remain competitive, we initiated several capital projects, including repainting all interior hallways, doors, and ceilings, and the exterior of all apartment buildings, installation of new LED lighting fixtures throughout the hallways, and the repair/replacement of all flooring throughout the hallways of each apartment building. We believe each of these projects will improve the marketability to potential residents. The total cost to complete the capital projects is anticipated to be $431,200.

- *Airbnb's:*

  Currently, there are nine townhomes that have not been leased, and we plan to use these as Airbnb's during the football season in order to generate more income on football weekends and help offset the lower income generated by the market softness.

COASTAL RIDGE UPDATE

Due to the increased competition and operating environment throughout the South Bend market, we engaged Coastal Ridge Real Estate, a new property management partner for the Irish Row property. Coastal Ridge manages student housing assets across various markets throughout the U.S. and currently provides property management services for two student housing properties adjacent to Irish Row.

On June 17, 2025, Coastal Ridge took over as property manager, and preleasing velocity increased dramatically from 51.84% to 74.54%. However, due to the competitive challenges and the operating environment, rents have been substantially discounted to drive occupancy and position the Property for stable cash flow in the upcoming years

Given Coastal Ridge's experience and familiarity with the South Bend leasing cycle, as well as their local connectivity, we believe this change better aligned with our short and long-term goals for the Property and will allow Irish Row to lease up to a similar occupancy as the rest of the market going forward.

LOAN STATUS

We have continued to update the lender about the leasing and performance of the Property. At this time, there are no changes with the loan, however, we anticipate that the Property will not meet the required loan covenants at the end of 2025, and we will begin working with the lender to address this issue.

UNIVERSITY ENROLLMENT & LONG-TERM GROWTH TRENDS REMAIN POSITIVE

The University of Notre Dame has experienced growth in year-over-year enrollment in three of the past four school years, and we continue to believe in its long-term health. In the academic year ending May 2024, Notre Dame recorded its highest enrollment on record, totaling 13,174, which represents a 0.5% increase over the prior year. The following table outlines the enrollment for 2022 through 2024:

				Academic Years Ending May	
	2024	2023	2022	2021	2020
Students					
Undergraduate	8,968	8,971	8,973	8,874	8,732
Graduate and professional	4,206	4,134	4,166	3,935	3,951
Total fall enrollment	13,174	13,105	13,139	12,809	12,683

Per a recent press release from the school, there have been 35,401 restricted early action and regular decision applicants and 3,186 admissions for the graduating Class of 2029; the highest number of applications and the lowest admission rate in the school's history. We are hopeful this is a short-term decrease in admissions, and the renovations and construction of new dormitories will result in increased enrollment in the future.

DISTRIBUTION ADJUSTMENT

Investors are currently receiving a cash-on-cash return of 4.50%. However, the occupancy for 2025/26 academic year and discounted rental rates have significantly impacted cash flow for the Property. **As a result, distributions will cease after the December 8, 2025, distribution.** The Asset Manager will continue to evaluate property operations with a view to reinstating distributions once there is an improvement in cash flow and will notify investors of any future adjustments. The Asset Manager plans to host a webinar in 2026 to provide an update on pre-leasing efforts for the 2026-2027 school year.

WEBINAR LINK

Investors can access a pre-recorded webinar to listen to the information in this letter, by clicking on the following link and, when prompted, using the password provided below:
